GLOBALG.A.P. PRODUCT LIST

1 INTEGRATED FARM ASSURANCE (IFA) STANDARD

This 'GLOBALG.A.P. Product List' also covers all products for the localg.a.p. Primary Farm Assurance (PFA) standard, the Harmonized Produce Safety Standard (HPSS), the Integrated Farm Assurance benchmarked schemes and checklists (Resembling and Equivalent), GLOBALG.A.P. standards (e.g., Livestock Transport standard, Crops for Processing standard, Chain of Custody standard, Compound Feed Manufacturing standard, etc.) and add-ons.

A list with translations of all the products included in the following lists is available at the following link:

https://www.globalgap.org/content/galleries/documents/GLOBALGAP_product_upload_sheet_en.xlsx

NOTE: This list is not exhaustive and new products can be added on request to and after approval by the GLOBALG.A.P. Secretariat. Send written requests to **customer_support@globalgap.org** with the following information: *product name, scientific name, and any additional information* that can assist to make a decision whether or not to accept the product.

1.1 SCOPE: CROPS BASE

Criteria for inclusion into this list of a product are by necessity arbitrary, based on a GLOBALG.A.P. decision.

GLOBALG.A.P. certification cannot be achieved for wild crops such as mushroom, walnut, lychee/litchi, etc. that are not cultivated. Also, GLOBALG.A.P. certification is not possible for crops used for their therapeutic (aromatic), medicinal, or recreational purposes. Medicinal purposes are defined as follows: Any plant used with the specific intent of treating a specific physical illness, disease, and/or mental distress.

Additionally, products for recreational use (e.g., tobacco, betel, opium poppy, marijuana, etc.) are not covered under the GLOBALG.A.P. scope.

1.1.1 Sub-Scope: Fruit and Vegetables – Specialty Crops

Fruit and vegetables, for the purpose of GLOBALG.A.P. certification, are defined by GLOBALG.A.P. in 'Table 1' below.

The range of products can be defined as: products originating from plants which are commonly designated as producing either fruit, vegetables, edible roots, bulbs, tubers, nuts, spices, or herbs, for fresh, cooked or processed consumption by humans.

More details on the specific certifiable product can be added in brackets to the paper certificate, for example mushroom (oyster mushroom), banana (red banana), etc.

NOTE 1: Herbs: Products classified as herbs in general are listed in the product list as individual products, with separate identification numbers.

However, where more than one herb product is grown, residue testing does not have to be performed on each individual product (herb), but according to the risk of the group of "herbs" .

Also, the use of plant protection products on herbs is applicable to herbs as a group and not for each individual product (herb).

NOTE 2: Leafy Greens in General: Also called potherbs, greens, vegetable greens, or salad greens, these products' plant leaves are for human consumption, and can sometimes be accompanied by tender petioles and shoots. Examples include, but are not limited to lettuce, cabbages, herbs, celery, spinach, endives, cress-types, etc.

NOTE 3: Hemp: *C. sativa* varieties used for purely medicinal or recreational purposes (including psychoactive products) are excluded from the GLOBALG.A.P. scope. "Hemp (industrial)" and "hemp (herb)" with a low level of Tetrahydrocannabinol (THC) can be certified under the GLOBALG.A.P. scope. According to Brenneisen et al 1987 (www.internationalhempassociation.org/jiha/jiha5210.html), cannabis can be divided into three distinct categories based on the percentage of THC in the upper third of the leaves: drug types (>1% THC) whose products are used recreationally and medicinally; inter-mediate types (>0.3-1.0% THC) with only a small drug potential, depending on the CBD/THC ratio; and fiber types (industrial hemp, fiber hemp) ($\leq 0.3\%$ THC) used for the production of fiber and seeds with no drug potential. Therefore, for the purposes of GLOBALG.A.P. only hemp varieties with $\leq 0.3\%$ THC, including hemp as ingredient of products for health and well-being (e.g., CBD oil), are covered under the GLOBALG.A.P. scope.

The hemp sampling guidelines to test for THC levels, as issued by the United States Department of Agriculture (USDA), can be followed as a guide: www.ams.usda.gov/sites/default/files/media/SamplingGuidelinesforHemp.pdf

NOTE 4: For Fruit and Vegetables products grown in pots, if the intention is to grow mature plants in pots and sell them to the end consumer (even without mature fruit), the product shall be certified under the Fruit and Vegetables sub-scope. If the edible part of the plant is not present at the time of sale, residue testing is not required. If seedlings are grown in pots and sold as seedlings to producers, the seedlings shall be certified under the Plant Propagation Material sub-scope.

NOTE 5: Sprouts, Microgreens, and Baby Leaf Greens : Sprouts are *not* covered under the GLOBALG.A.P. scope; however, microgreens and baby leaf greens are covered. To determine in which category the particular product falls, please consider the following definitions:

- *Sprouts*: are the first visible stage of germination, where the only leaf is the cotyledon and no true leaves have been formed as yet. The seed, young stems and cotyledon(s) are edible. *Sprouts and the sprouting production process (no matter the age of the plant) are excluded from the GLOBALG.A.P. product list.*
- *Microgreens (ID 100108)*: includes the edible shoots, cotyledon(s) and first leaves of salad vegetables and herbs, harvested just after the first true leaves, but before the second set of true leaves have developed. Harvest normally takes place between 2-3 weeks from planting.
- *Baby leaf greens (ID 127)*: includes all the leafy salad crops that would be harvested at an immature stage. A baby-leaf crop is defined as the young leaves and petioles of any plants grown for harvest beyond the seedling stage (after true leaves have formed) but before the "eight true leaves" stage – in other words, any salad crops harvested before possessing eight true leaves will be classed as baby leaves. Specific types of baby leaf greens are listed with separate ID codes. However, if the specific grouping is not available, the baby leaf greens can be listed under this ID code.

NOTE 6: Certification Scope for Nuts: "Hulling" means to remove the outer softer or leafy part of e.g. nuts. Alternatively, this process is also called "husking". This is covered by IFA because it can be seen as a similar activity to trimming. "Shelling" means to remove the hard brown shell (e.g. of nuts), and this process is *not* covered by IFA. This is a similar interpretation for products like rice that falls under the sub-scope Combinable Crops.

NOTE 7: Risk Classification of Fruit and Vegetable Products: To maintain GFSI recognition, under the new version(s) of GLOBALG.A.P. IFA (v5.4-1-GFS) and HPSS, it is not possible for the certification body (CB) to inspect only a sample of producers or sites when high-risk crops are produced under the scope of certification. Rather, in the case of high-risk products, the CB shall visit *each* site or producer member.

Therefore, in the Crop Rules 4.1.2 (ii), 4.2 and GR Part III 5.3.2.1 it states that in Option 1 multi-sites with a QMS or Option 2 scenarios, all producers and/or sites with high-risk products shall be included in an annual inspection schedule. No sampling can take place and the products shall be inspected annually.

High-risk products include:

- Fresh herbs, leafy greens, lettuce, romaine, spinach, arugula/rocket
- Berries
- Cantaloupe melons
- Any other product associated with known foodborne disease outbreaks

Specific products classed as leafy greens, berries, or herbs, which are categorized as high-risk, are identified by adding a ^{*HR} next to the specific product listing. This categorization, however, is not final and may be updated as new information about products becomes available.

a) Leafy Green Vegetables

The highest-risk types of leafy greens are those:

- Having an “open growth” aspect (*with leaves not forming in a tight formation or head, e.g., romaine, spinach*) as opposed to “closed growth” aspects (*tight formation of inner leaves forming a head, e.g., cabbage*);
- With edible parts of the leafy green plant grown close to the ground; and/or
- Usually eaten raw.

b) Berries

The way the berries are harvested (machine or non-machine/hand harvest) does not influence their risk classification.

c) Cantaloupe Melons

Due to a history of foodborne disease outbreaks, cantaloupe melon is listed as high-risk. It is also now listed as a separate product in the product list.

1.1.2 Sub-Scope: Combinable Crops – Field Crops

Combinable crops, for the purpose of GLOBALG.A.P. certification, are defined by GLOBALG.A.P. in 'Table 1' below.

The range of products can be defined as: products originating from production systems, which are commonly designated as producing either grain, pulses, fodder, or extracts (oil, sugar, starch, etc.), for cooked or processed consumption by humans or animals, or for use in industry.

Other descriptions for this type of product are “broad-acre crops”, “bulk crops”, or “arable crops”.

NOTE 1: If paddy rice producers use postharvest machinery for rough rice drying, husking, and brown rice packaging of their own rice consecutively on their own farm, these activities may be covered under the Combinable Crops sub-scope.

1.1.3 Sub-Scope: Flowers and Ornamentals

Flowers and ornamentals, for the purpose of GLOBALG.A.P. certification, are defined by GLOBALG.A.P. in 'Table 1' below. Flower and ornamental plants, *not* used for edible purposes, are certified under the sub-scope Flowers and Ornamentals.

For the certificate template the certified species shall always be included e.g., cut flowers – carnations

For the Flowers and Ornamentals sub-scope, the product list only describes *generic categories*. Therefore, in terms of the Flowers and Ornamentals sub-scope, the definitions of parallel production and parallel ownership are as follows:

Parallel Production (PP):

PP is the situation where individual producers, producer members, or producer groups produce the same *species* partly as certified and partly as non-certified. It is also PP where not all the members of a producer group producing a *species* that is registered for certification are included in the scope of the certificate.

Example: A producer grows roses. Only a part of the roses production will be certified.

A situation in which a farmer produces one *species* as certified and another *species* as non-certified is not PP (e.g., roses certified and carnations non-certified).

Parallel Ownership (PO):

PO is the situation where individual producers, producer members, or producer groups buy non-certified products of the same *species* they grow under certified production.

Example: A producer grows certified roses and buys non-certified roses from other producer(s).

Classification Guidelines for Generic Listings:

- a. Bamboo and ornamental grass: Woody plants with hollow stems and/or plants from the grass family sold for ornamental purposes
- b. Bedding plant: Plants set into a garden bed or container when it is about to bloom, usually an annual used for display and discarded at the end of the season

- c. Cactus/Succulent: Plants with thick succulent stems and thorny spines instead of leaves, well adapted in dry areas
- d. Cut flower: Any flowers or flower buds (often with some stem and leaf) that have been grown and cut from the plant bearing it; usually removed from the plant for indoor decorative use
- e. Flowering bulbs: Flowering plants, in pots or outside, grown from a bulb or a tuber
- f. Hardy plants: Plants that can tolerate cold winters and frost and can over-winter outdoors
 - (i) Hardy plants – deciduous shrub: Hardy shrubs losing their leaves during colder months
 - (ii) Hardy plants – indecious shrub: Hardy shrubs that do not loose their leaves seasonally (therefore evergreen)
 - (iii) Hardy plants – conifer: Cone-like evergreen hardy plants that bear needle shaped or scale-like leaves
 - (iv) Hardy plants – hedge plant: Special type of hardy shrubs planted to form a border
 - (v) Hardy plants – climbing plant: A group of hardy plants with weak stems that climb up trees and other objects by using their stems to twine around a support structure and/or making use of sucking organs
 - (vi) Hardy plants – rose: A prickly hardy bush or shrub that typically bears various colors of fragrant flowers
- g. House plants: Plants grown indoors (e.g., homes, offices, etc.) for decorative purposes
 - (i) House plants – flowering plant: House plants grown specifically for their flowers
 - (ii) House plants – green foliage: House plants grown specifically for their green foliage
 - (iii) House plants in pots (mixed varieties): House plants planted in pots that contain a mixture between flowering and foliage plants
 - (iv) House plants – orchid: Plants with complex flowers having a large specialized petal (labellum) and also lacking a permanent woody structure
- h. Ornamental gourd: The hard-shelled fruit of any of various plants, whose dried shell is used for ornamental purposes. In this case only the production and harvesting processes are covered, and *not* the drying/curing/preserving process.
- i. Garden plants in pots (mixed varieties): Ornamental plants that will be kept outside in pots and that contain a mixture of different plants
- j. Perennials: Plants living for more than 2 years
 - (i) Perennials – flowering plant: Perennial plants grown specifically for their flowers
 - (ii) Perennials – green foliage: Perennial plants grown specifically for their green foliage
 - (iii) Perennials – ground cover plant: Low dense-growing plants covering the surface of the ground
 - (iv) Perennials – aquatic ornamental plant: Water plants (with or without flowers) growing partially or fully in fresh water
- k. Trees: A plant with an elongated stem or trunk, supporting branches and leaves, and tending to be long-lived
- l. Turf: A grass type that keeps the surface layer of the earth together by means of its roots

- Note: In the case of the green foliage used with cut flowers in flower arrangements, these plants can be certified under the most applicable listing under the sub-scope Flowers and Ornamentals. For example, if the green foliage comes from a perennial plant, Perennial green foliage (ID 100015) can be used. If the green foliage originates from trees, then Trees (ID 398) can be used. In all these cases, the certification body shall include the specific plant, in brackets, on the paper certificate.

1.1.4 Sub-Scope: Hop

Hop, for the purpose of GLOBALG.A.P. certification, is defined by GLOBALG.A.P. in 'Table 1' below.

Hop cones for brewing shall be certified after compliance with the All Farm Base + Crops Base + Hop modules. However, when hop shoots are included in the scope of certification, together with hop cones for brewing, the producer shall comply with the All Farm Base + Crops Base + Hop + Fruit and Vegetables modules. If the producer is *only* applying for certification of hop shoots (no brewing), the producer shall comply with the All Farm Base + Crops Base + Fruit and Vegetables modules.

1.1.5 Sub-Scope: Tea

Tea, for the purpose of GLOBALG.A.P. certification, is defined by GLOBALG.A.P. in 'Table 1' below. Only *Camellia sinensis* is covered under this sub-scope. However, if the tea leaves of this species are either to be consumed fresh (infusion) or handled directly by the consumer (e.g., sold in pots) then the sub-scope FV would be applicable.

1.1.6 Sub-Scope: Plant Propagation Material

Plant propagation material for the purpose of GLOBALG.A.P. certification is defined by GLOBALG.A.P. in 'Table 1' below.

All types of plant propagation material are covered under this sub-scope e.g., seedlings, rootstocks, cuttings, seed, etc. Propagation methods, like *in vitro* propagation, are also covered. It is applicable to all of the products listed under the Crops Base scope, however the products for the sub-scope Plant Propagation Material each have their own ID number (different from the IDs allocated to the products listed under Fruit and Vegetables, Flowers and Ornamentals, Combinable Crops, Hop, and Tea). Products that are certified under the sub-scope Plant Propagation Material will have "PPM" indicated in brackets next to the name, for example "lettuce (PPM)". The CBs can then indicate, in brackets, the specific type of plant propagation material for example "lettuce (PPM) (seedlings)" in the paper certificate, if required.

Disclaimer for seed certification: The certification of seed is only applicable for producers contracted by seed companies. These producers are not allowed to sell the seeds by themselves directly to the market as propagation material, as the GLOBALG.A.P. certification is to demonstrate the use of good agricultural practices during the production process, but it does not include controls on quality and purity. Seed potatoes are also covered under this statement. These seeds cannot be used for human consumption or feed.

Plant propagation material sold as plant propagation material is certified as plant propagation material. If plant propagation material bears edible fruits at the time of sale, it has to be certified under the sub-scope Fruit and Vegetables.

Table 1: GLOBALG.A.P. List of Certifiable Products – CROPS BASE [Sub-Scopes: Fruit and Vegetables, Combinable Crops, Flowers and Ornamentals, Hop, Tea, Plant Propagation Material]

Product Name	Scientific Name	CROPS BASE (Sub-Scopes)					
		Fruit and Vegetables	Combinable Crops	Flowers and Ornamentals	Hop	Tea	Plant Propagation Material
Abiu fruit	<i>Pouteria caimito</i>	100938					100937
Acacia pennata leaf	<i>Acacia pennata</i>	328					760
Acerola/Barbados cherry	<i>Malpighia emarginata</i>	198					661
Achacha	<i>Garcinia humilis</i>	99526					99527
Adzuki bean	<i>Vigna angularis</i>		474				821
Agretti	<i>Salsola soda</i>	448					807
Alfalfa	<i>Medicago sativa</i>		312				746
Almond	<i>Prunus dulcis</i>	1					493
Aloe vera	<i>Aloe vera</i>	173					637
Amaranth seed	<i>Amaranthus</i> spp.		256				706
Amaranth	<i>Amaranthus</i> spp.	100035					
Angelica (herb)	<i>Angelica archangelica</i>	99515					99516
Aniseed	<i>Pimpinella anisum</i>	860					922
Anise hyssop (herb) *HR	<i>Agastache foeniculum</i>	861					923
Appleberry *HR	<i>Billardiera scandens</i>	243					696
Annatto	<i>Bixa orellana</i>	100939					100940
Apple	<i>Malus domestica</i>	2					494
Apricot	<i>Prunus armeniaca</i>	3					495
Artichoke	<i>Cynara cardunculus</i>	4					496
Arugula/Rocket (herb) *HR	<i>Eruca sativa</i>	125					601
Asian pear	<i>Pyrus pyrifolia</i>	232					687
Asparagus	<i>Asparagus officinalis</i>	5					497
Atemoya	<i>Annona</i> – cross between sweetsop (<i>Annona squamosa</i>) and the cherimoya (<i>A. cherimola</i>)	302					738
Aubergine/Eggplant	<i>Solanum melongena</i>	6					498

Product Name	Scientific Name	CROPS BASE (Sub-Scopes)					
		Fruit and Vegetables	Combinable Crops	Flowers and Ornamentals	Hop	Tea	Plant Propagation Material
Avocado	<i>Persea americana</i>	7					499
Aztec sweet herb (herb) *HR	<i>Lippia dulcis</i> ; <i>Phyla dulcis</i>	862					924
Baby banana	<i>Musa</i> spp.	126					602
Baby beet greens *HR	<i>Beta vulgaris</i> var. <i>esculenta</i>	100098					
Baby corn	<i>Zea mays</i>	8					500
Baby leaf brassica (1) *HR	<i>Brassica</i> spp.	100099					
Baby leaf chard (2) *HR	<i>Beta vulgaris</i> var. <i>cicla</i>	100100					
Baby leaf chicory (3) *HR	<i>Cichorium intybus</i>	100101					
Baby leaf endive (4) *HR	<i>Cichorium endivia</i>	100102					
Baby leaf lamb's lettuce *HR	<i>Valerianella locusta</i>	100103					
Baby leaf lettuce (5) *HR	<i>Lactuca sativa</i>	100104					
Baby leaf rocket *HR	<i>Eruca sativa</i>	100105					
Baby leaf greens (6) *HR	Various spp.	127					
Baby leaf spinach (7) *HR	<i>Spinacia oleracea</i>	100106					
Baby leaf wild rocket (8) *HR	<i>Diplotaxis tenuifolia</i>	100107					
Balloon berry *HR	<i>Rubus illecebrosus</i> – cross between strawberry (<i>Fragaria ananassa</i>) and raspberry (<i>Rubus idaeus</i>)	100177					100178
Balm (herb) *HR	<i>Melissa officinalis</i>	863					925
Balsam apple	<i>Momordica balsamina</i>	263					710
Bambara groundnut	<i>Vigna subterranea</i>		100933				100934
Bamboo and ornamental grass	Various spp.			425			790
Bamboo shoots	<i>Dendrocalamus asper</i>	219					674
Banana	<i>Musa acuminata</i>	9					501
Barley	<i>Hordeum vulgare</i>		123				600
Basil (herb) *HR	<i>Ocimum basilicum</i>	864					926
Bedding plants	Various spp.			288			729
Beetroot	<i>Beta vulgaris</i> subsp. <i>vulgaris</i>	11					503

Product Name	Scientific Name	CROPS BASE (Sub-Scopes)					
		Fruit and Vegetables	Combinable Crops	Flowers and Ornamentals	Hop	Tea	Plant Propagation Material
Bellflower root/Doraji	<i>Platycodon grandiflorus</i>	467					815
Bilberry ^{*HR}	<i>Vaccinium myrtillus</i>	15					506
Birdsfoot trefoil	<i>Lotus corniculatus</i>		99509				99510
Bitter bean/Petai	<i>Parkia speciosa</i>	100153					100154
Bitter melon	<i>Momordica charantia</i>	262					709
Bitter orange	<i>Citrus aurantium</i> ; <i>C. bergamia</i>	469					817
Black cumin	<i>Bunium bulbocastanum</i>	865					927
Black gram	<i>Vigna mungo</i>		100927				100928
Black nightshade	<i>Solanum nigrum</i>	985					984
Black salsify	<i>Scorzonera hispanica</i>	13					504
Blackberry ^{*HR}	<i>Rubus fruticosus</i>	14					505
Blackcurrant ^{*HR}	<i>Ribes nigrum</i>	179					643
Blackthorn fruit	<i>Prunus spinosa</i>	100945					100946
Blue-berried honeysuckle	<i>Lonicera caerulea</i>	334					764
Blueberry ^{*HR}	<i>Vaccinium corymbosum</i> ; <i>V. angustifolium</i>	197					660
Borage (herb)	<i>Borago officinalis</i>	866					928
Boysenberry ^{*HR}	<i>Rubus ursinus</i> x <i>idaeus</i>	311					745
Brassicas	Various <i>Brassica</i> spp.	268					715
Brazil nut	<i>Bertholletia excelsa</i>	250					700
Breadfruit	<i>Artocarpus altilis</i>	845					851
Broad bean/Fava bean	<i>Vicia faba</i>	399					775
Broccoli	<i>Brassica oleracea</i> var. <i>italica</i>	16					507
Broccoli seed	<i>Brassica oleracea</i> var. <i>italica</i>		100925				
Broccoletti/Brocchetto	<i>Brassica oleracea</i> var. <i>italica</i> x <i>alboglabra</i>	271					718
Brussel sprouts	<i>Brassica oleracea</i> var. <i>gemmifera</i>	17					508
Buckwheat	<i>Fagopyrum esculentum</i>		257				707
Bulbs (end product bulbs)	Various spp.						791

Product Name	Scientific Name	CROPS BASE (Sub-Scopes)					
		Fruit and Vegetables	Combinable Crops	Flowers and Ornamentals	Hop	Tea	Plant Propagation Material
Butternut squash	<i>Cucurbita moschata</i>	128					604
Cabbage leaf mustard/Mustard greens/Chinese mustard *HR	<i>Brassica juncea</i> var. <i>rugosa</i>	436					798
Cabbage	<i>Brassica oleracea</i> var. <i>capitata</i> ; <i>B. oleracea</i> var. <i>medullosa</i> ; <i>B. oleracea</i> var. <i>sabauda</i>	18					509
Cacao fruit	<i>Theobroma cacao</i>	416					787
Cactus/Succulent	<i>Cactaceae</i> family			100002			100018
Calabash	<i>Lagenaria siceraria</i>	264					711
Campion (herb) *HR	<i>Silene vulgaris</i>	100086					100087
Camellia oleifera seed	<i>Camellia oleifera</i>		393				771
Canistel/Eggfruit	<i>Pouteria campechiana</i>	849					855
Cantaloupe melon *HR	<i>Cucumis melo</i> var. <i>cantalupensis</i> ; <i>C. melo</i> var. <i>reticulatus</i>	100168					100169
Capers	<i>Capparis spinosa</i>	318					752
Capsicum (pepper/chilli)	Genus <i>Capsicum</i>	400					776
Carambola/Star fruit	<i>Averrhoa carambola</i>	287					728
Caraway	<i>Carum carvi</i>	867					929
Cardamom	<i>Elettaria cardamomum</i> ; <i>Amomum compactum</i>	174					638
Cardoon	<i>Cynara cardunculus</i>	100200					100202
Carrot	<i>Daucus carota</i>	20					510
Cashew	<i>Anacardium occidentale</i>	246					699
Cassava root/Manioc/Yucca	<i>Manihot esculenta</i>	180					644
Castor bean	<i>Ricinus communis</i>		406				781
Catnip (herb)	<i>Nepeta cataria</i>	868					930
Cauliflower	<i>Brassica oleracea</i> var. <i>botrytis</i>	21					511
Celeriac (celery root)	<i>Apium graveolens</i> var. <i>rapaceum</i>	22					512
Celery *HR	<i>Apium graveolens</i> var. <i>dulce</i> ; <i>A. graveolens</i> var. <i>secalinum</i>	23					513
Cereal grass ⁽⁹⁾ *HR	Various spp.	100045					

Product Name	Scientific Name	CROPS BASE (Sub-Scopes)					
		Fruit and Vegetables	Combinable Crops	Flowers and Ornamentals	Hop	Tea	Plant Propagation Material
Chameleon plant (herb) ^{*HR}	<i>Houttuynia cordata</i>	869					931
Chamomile (herb)	<i>Chamaemelum nobile</i> ; <i>Matricaria chamomilla</i>	870					932
Chard ^{*HR}	<i>Beta vulgaris</i> var. <i>cicla</i>	24					514
Chayote	<i>Sechium edule</i>	129					605
Cheese plant	<i>Paederia lanuginosa</i>	100172					100173
Cherry	<i>Prunus avium</i>	25					515
Chervil (herb) ^{*HR}	<i>Anthriscus cerefolium</i>	871					933
Chestnut	<i>Castanea sativa</i> (most common species)	26					516
Chia	<i>Salvia hispanica</i>		325				758
Chickpea	<i>Cicer arietinum</i>		199				662
Chickweed (herb) ^{*HR}	<i>Stellaria media</i>	872					934
Chicory	<i>Cichorium intybus</i>	27					517
Chilean guava/Murta berry ^{*HR}	<i>Ugni molinae</i>	100130					100131
Chinese artichoke	<i>Stachys affinis</i> ; <i>S. sieboldii</i>	320					753
Chinese bayberry ^{*HR}	<i>Myrica rubra</i>	326					759
Chinese cabbage	<i>Brassica rapa</i> subspecies	130					606
Chinese flowering cabbage/False pak choi ^{*HR}	<i>Brassica rapa</i> var. <i>parachinensis</i>	442					804
Chinese kale/Chinese broccoli ^{*HR}	<i>Brassica oleracea</i> var. <i>alboglabra</i>	437					799
Chinese plum/Japanese apricot	<i>Prunus mume</i>	471					819
Chives (herb) ^{*HR}	<i>Allium schoenoprasum</i>	30					518
Chokeberry ^{*HR}	<i>Aronia</i> spp.	313					747
Chufa/Tiger nut	<i>Cyperus esculentus</i>	856					857
Cinnamon bark	<i>Cinnamomum verum</i>	100111					
Citron	<i>Citrus medica</i>	409					784
Citrus hassaku	<i>Citrus x hassaku</i>	439					801

Product Name	Scientific Name	CROPS BASE (Sub-Scopes)					
		Fruit and Vegetables	Combinable Crops	Flowers and Ornamentals	Hop	Tea	Plant Propagation Material
Citrus leaf	<i>Citrus</i> spp.	100036					
Clementine	<i>Citrus x clementina</i>	31					519
Clove	<i>Syzygium aromaticum</i>	100929					100930
Clover (forage)	<i>Trifolium</i> spp.		100109

- (1) **Baby leaf *Brassica* (ID 100099):** This product includes numerous varieties (e.g., tatsoi, pak choi, mizuna, kale, mustard spinach, mibuna) harvested at an immature stage (as defined by the clarification of baby leaf greens (ID 127)). The specific variety can be listed in brackets on the paper certificate if more transparency is required.
- (2) **Baby leaf chard (ID 100100):** This product includes all chard varieties and cultivars harvested at an immature stage (as defined by the clarification of baby leaf greens (ID 127)). The specific variety can be listed in brackets on the paper certificate if more transparency is required.
- (3) **Baby leaf chicory (ID 100101):** This product includes all chicory types (radicchio, sugarloaf and witloof with associated varieties) harvested at an immature stage (as defined by the clarification of baby leaf greens (ID 127)). The specific variety can be listed in brackets on the paper certificate if more transparency is required.
- (4) **Baby leaf endive (ID 100102):** This product includes all endive varieties and cultivars harvested at an immature stage (as defined by the clarification of baby leaf greens (ID 127)). The specific variety can be listed in brackets on the paper certificate if more transparency is required.
- (5) **Baby leaf lettuce (ID 100104):** This product includes all lettuce varieties harvested at an immature stage (as defined by the clarification of baby leaf greens (ID 127)) such as Batavia, iceberg, crisp-head, butterhead, etc. The specific variety can be listed in brackets on the paper certificate if more transparency is required.
- (6) **Baby leaf greens (ID 127) –** see NOTE 5 in clause 1.1.1 Sub-Scope: Fruit and Vegetables – Speciality Crops
- (7) **Baby leaf spinach (ID 100106):** This product includes all spinach types and varieties harvested at an immature stage (as defined by the clarification of baby leaf greens (ID 127)). The specific variety can be listed in brackets on the paper certificate if more transparency is required.
- (8) **Baby leaf wild rocket (ID 100107):** This is the baby leaf form of perennial wall-rocket. The specific variety can be listed in brackets on the paper certificate if more transparency is required.
- (9) **Cereal grass (ID 100045):** The young green plants (including the leaves) of grain plants (e.g., barley, wheat, etc.) that are consumed fresh and/or used for further processing (note no processing included under this scope). These crops, as plant propagation material or combinable crops, must still be certified under the applicable grain crop e.g., barley (ID 600), or wheat (ID 635).
- (10) **Courgette (ID 34):** All *Cucurbita pepo* varieties that are soft shelled but harvested when fruit is still immature e.g., vegetable marrows, pattypan squash, zucchini.
- (11) **Edible leaf (ID 100046):** Leaves from plants like vegetables, grains, legumes, etc. (where the stems, roots and/or seeds are more known to be used) that are used for edible purposes. Examples include leaves of products like carrots, peas, sunflowers, maize, cucumbers, beetroot, broccoli, cabbages, etc. It does not include leaves purely used for medicinal purposes or baby leaf greens.
- (12) **Hemp (ID 667) – sub-scope Plant Propagation Material:** Industrial hemp and hemp (herb) as plant propagation material, with a low Tetrahydrocannabinol (THC) concentration. Also see note 3 under clause 1.1.1 of this document for further clarification.
- (13) **Hemp (herb) (ID 100128) – sub-scope Fruit and Vegetables:** Fresh hemp (solely for fresh consumption, e.g., in salads) with a low Tetrahydrocannabinol (THC) value is covered under this product. Also see note 3 under clause 1.1.1 of this document for further clarification.
- (14) **Hemp (industrial) (ID 204) – sub-scope Combinable Crops:** A variety of the *Cannabis sativa* plant species that is grown specifically for industrial uses of its derived products (e.g., processed, cooked, fiber, etc.). Only dried hemp with a low Tetrahydrocannabinol (THC) concentration is covered under this product. Dried hemp (including seeds) is typically harvested mechanically or by machine. Also see note 3 under clause 1.1.1 of this document for further clarification.
- (15) **Mangetout (ID 67):** This product includes all *Pisum sativum* cultivars where the immature peas with pods are consumed. The name mangetout also applies to sugar snap peas and snow peas.
- (16) **Microgreens (ID 100108):** – see NOTE 5 in clause 1.1.1 Sub-Scope: Fruit and Vegetables – Speciality Crops.
- (17) **Pea (ID 90):** This product includes all *Pisum sativum* cultivars where the pods are *not* consumed – only the fresh seeds.
- (18) **Pumpkin (ID 100):** All winter squash (*Cucurbita maxima*) varieties that are large-fruited, hard-shelled, and harvested when fruit are fully matured e.g., crown prince, etamples, golden delicious, hokkaido, hubbard, golden hubbard, warted hubbard, kabocha, Queensland blue, sweet dumpling, white cheesequake.
- (19) **Squash (ID 110):** Winter and summer squash (*Cucurbita pepo*) varieties that are hard-shelled e.g., acorn squash, delicata squash, gem squash, spaghetti squash.
- (20) **Romaine/Cos lettuce [ID 100138 (FV) and ID 100139 (PPM)]:** Due to the high risk of microbial contamination associated with this particular variety, it is now listed as a separate product. Baby leaf romaine/cos lettuce also falls within this ID for Fruit and Vegetables.

*HR: High-risk product

1.2 SCOPE: LIVESTOCK BASE

Criteria for inclusion into this list of a product are by necessity arbitrary, based on a GLOBALG.A.P. decision. GLOBALG.A.P. certification cannot be achieved for wild game/catch that are not farmed. Livestock certified as GLOBALG.A.P. cover *all* animals of that type present on farm.

1.2.1 Sub-Scope: Ruminant Base

- (i) Cattle and Sheep
- (ii) Dairy
- (iii) Calf/Young Beef

1.2.2 Sub-Scope: Pigs

1.2.3 Sub-Scope: Poultry

1.2.4 Sub-Scope: Turkey

Table 2: GLOBALG.A.P. List of Certifiable Products – LIVESTOCK BASE [Sub-Scopes: Cattle and Sheep, Dairy, Calf/Young Beef, Pigs, Poultry, Turkey]

Product Name	Scientific Name	LIVESTOCK BASE (Sub-Scopes)					
		Cattle and Sheep	Dairy	Calf/Young Beef	Pigs	Poultry	Turkey
Bovine	<i>Bos taurus; B. indicus</i>	168					
Breeding boar (IKB) ⁽¹⁾	<i>Sus domestica</i>				100198		
Breeding sow (IKB) ⁽²⁾	<i>Sus domestica</i>				100197		
Broiler chicken	<i>Gallus gallus</i>					166	
Calf	<i>Bos taurus; B. indicus</i>			330			
Finishing pig (IKB) ⁽³⁾	<i>Sus domestica</i>				100196		
Gilt (IKB) ⁽⁴⁾	<i>Sus domestica</i>				100195		
Milk	From <i>Bos taurus</i> or <i>B. indicus</i>		167				
Pig	<i>Sus domestica</i>				153		
Sheep	<i>Ovis aries</i>	169					

Product Name	Scientific Name	LIVESTOCK BASE (Sub-Scopes)					
		Cattle and Sheep	Dairy	Calf/Young Beef	Pigs	Poultry	Turkey
Suckling piglet (IKB) ⁽⁵⁾	<i>Sus domestica</i>				100193		
Turkey	<i>Meleagris gallopavo</i>						276
Weaned piglet (IKB) ⁽⁶⁾	<i>Sus domestica</i>				100194		
Young beef	<i>Bos taurus; B. indicus</i>			331			

NOTE: IKB marked products are only applicable for benchmarked schemes

⁽¹⁾**Breeding boar (IKB) (ID 100198):** Male pigs used for breeding purposes.

⁽²⁾**Breeding sow (IKB) (ID 100197):** Female pigs, intended for piglet production starting from the first mating.

⁽³⁾**Finishing pig (IKB) (ID 100196):** Pigs older than 10 weeks and/or heavier than 25 kilos and intended for meat production and slaughter at ca. 110kg or higher.

⁽⁴⁾**Gilt (IKB) (ID 100195):** Female pigs destined for breeding purposes from a weight of 25 kilos or an age of 10 weeks to the first mating/insemination at an age of ca. 7 to 8 months.

⁽⁵⁾**Suckling piglet (IKB) (ID 100193):** Pigs nursed by a lactating sow up to the age of 28 days or longer. (Organic raised pigs may have a nursing period of 42 days.)

⁽⁶⁾**Weaned piglet (IKB) (ID 100198):** Pigs distracted from suckling up to the age of 10 weeks or weight of 25 kilos.

1.3 SCOPE: AQUACULTURE

GLOBALG.A.P. certification cannot be achieved for wild fish/catch that are not farmed. The Aquaculture scope applies to the production processes of a diversity of fish, crustaceans, and molluscs. It covers the entire production chain, from broodstock, seedlings, and feed suppliers to farming, harvesting, and processing.

Seaweed refers to seaweed or marine macro-algae; brown, red, or green.

New species can be added upon request, as long as seedlings are derived from domesticated broodstock under controlled systems (except for the passive collection from the planktonic phase). And the seedlings supply is under commercial status (not only research status).

Certified status for aquaculture products shall be reflected for both the product name and its scientific name.

NOTE: For each product in the Aquaculture v5, there shall be the possibility in the database to choose the following for each species:

- (i) Brood stock
- (ii) Seedlings (Ova)
- (iii) Seedlings (Juvenile)
- (iv) On-grown farm

Certifiable products include:

- Finfish (refers to fresh water and marine finfish and other fish, e.g., flatfish, eels, etc.)
- Crustaceans
- Molluscs
- Seaweed

Table 3: GLOBALG.A.P. List of Certifiable Products – AQUACULTURE [Finfish, Crustaceans, Molluscs, Seaweed]

Product Name	Scientific Name	AQUACULTURE			
		Finfish	Crustaceans	Molluscs	Seaweed
Adriatic sturgeon	<i>Acipenser naccarii</i>	99503			
American cupped oyster	<i>Crassostrea virginica</i>			379	
Arctic char	<i>Salvelinus alpinus</i>	343			
Asian bronze featherback	<i>Notopterus notopterus</i>	100192			
Asian swamp eel	<i>Monopterus albus</i>	100942			
Asiatic hard clam	<i>Meretrix meretrix</i>			100152	
Atlantic cod	<i>Gadus morhua</i>	100165			
Atlantic halibut	<i>Hippoglossus hippoglossus</i>	366			
Atlantic salmon	<i>Salmo salar</i>	338			
Barcoo grunter	<i>Scortum barcoo</i>	465			

Product Name	Scientific Name	AQUACULTURE			
		Finfish	Crustaceans	Molluscs	Seaweed
Barramundi	<i>Lates calcarifer</i>	364			
Barred sorubim	<i>Pseudoplatystoma fasciatum</i>	363			
Bighead carp	<i>Hypophthalmichthys nobilis</i>	920			
Blackspot seabream	<i>Pagellus bogaraveo</i>	100110			
Blotched snakehead	<i>Channa maculata</i>	458			
Blue mussel	<i>Mytilus edulis</i>			385	
Blue tilapia	<i>Oreochromis aureus</i>	346			
Bluespotted seabream	<i>Pagrus caeruleostictus</i>	452			
Brown-marbled grouper	<i>Epinephelus fuscoguttatus</i>	100079			
Brook trout	<i>Salvelinus fontinalis</i>	417			
Brown trout	<i>Salmo trutta fario</i>	418			
Brown trout	<i>Salmo trutta lacustris</i>	986			
Channel catfish	<i>Ictalurus punctatus</i>	358			
Chilean mussel	<i>Mytilus chilensis</i>			386	
Chilean-Peruvian scallop	<i>Argopecten purpuratus</i>			383	
Chinook salmon	<i>Oncorhynchus tshawytscha</i>	340			
Cobia	<i>Rachycentron canadum</i>	357			
Coho salmon	<i>Oncorhynchus kisutch</i>	339			
Common carp	<i>Cyprinus carpio</i>	410			
Common dentex	<i>Dentex dentex</i>	443			
Common octopus	<i>Octopus vulgaris</i>				100944
Common pandora	<i>Pagellus erythrinus</i>	841			
Common spiny lobster	<i>Palinurus elephas</i>		100150		
Corkwing wrasse	<i>Crenilabrus melops</i>	488			
Cuckoo wrasse	<i>Labrus mixtus</i>	491			
Dragon tiger grouper	<i>Epinephelus fuscoguttatus</i> × <i>E. lanceolatus</i>	100082			
European abalone	<i>Haliotis tuberculata</i>			422	
European flat oyster	<i>Ostrea edulis</i>			381	

Product Name	Scientific Name	AQUACULTURE			
		Finfish	Crustaceans	Molluscs	Seaweed
European seabass	<i>Dicentrarchus labrax</i>	349			
Flathead grey mullet	<i>Mugil cephalus</i>	100092			
Giant river prawn	<i>Macrobrachium rosenbergii</i>		375		
Giant snakehead	<i>Channa micropeltes</i>	980			
Giant tiger prawn	<i>Penaeus monodon</i>		369		
Gilthead seabream	<i>Sparus aurata</i>	350			
Goldsinny wrasse	<i>Ctenolabrus rupestris</i>	490			
Grass carp	<i>Ctenopharyngodon idella</i>	918			
Greasyback shrimp	<i>Metapenaeus ensis</i>		378		
Greater amberjack	<i>Seriola dumerili</i>	455			
Green mud crab	<i>Scylla paramamosain</i>		473		
Green mussel	<i>Perna viridis</i>			424	
Green tiger prawn	<i>Penaeus semisulcatus</i>		371		
Humpback grouper	<i>Cromileptes altivelis</i>	100081			
Hybrid striped bass	<i>Morone saxatilis</i> x <i>M. chrysops</i>	100149			
Indian white prawn	<i>Penaeus indicus</i>		373		
Japanese hard clam	<i>Meretrix lusoria</i>			100151	
Japanese meagre	<i>Argyrosomus japonicus</i>	463			
Kuruma prawn	<i>Penaeus japonicus</i>		370		
Large-eye dentex	<i>Dentex macrophthalmus</i>	842			
Large yellow croaker	<i>Larimichthys crocea</i>	100000			
Leopard coral grouper	<i>Plectropomus leopardus</i>	100080			
Lumpfish	<i>Cyclopterus lumpus</i>	487			
Matrinxã	<i>Brycon cephalus</i>	356			
Meagre	<i>Argyrosomus regius</i>	367			
Mediterranean mussel	<i>Mytilus galloprovincialis</i>			388	
Mozambique tilapia	<i>Oreochromis mossambica</i> or (<i>O. mossambicus</i>)	345			
New Zealand mussel	<i>Perna canaliculus</i>			389	

Product Name	Scientific Name	AQUACULTURE			
		Finfish	Crustaceans	Molluscs	Seaweed
Nile tilapia	<i>Oreochromis niloticus</i>	344			
North African catfish	<i>Clarias gariepinus</i>	359			
Olive flounder	<i>Paralichthys olivaceus</i>	449			
Pacific abalone	<i>Haliotis discus hannai</i>			421	
Pacific cupped oyster	<i>Crassostrea gigas</i>			380	
Pacu	<i>Piaractus mesopotamicus</i>	353			
Pangasius basa	<i>Pangasius bocourti</i>	348			
Pangasius tra	<i>Pangasianodon hypophthalmus</i>	347			
Pike-perch/Zander	<i>Sander lucioperca</i>	411			
Pink dentex	<i>Dentex gibbosus</i>	451			
Pirapitinga	<i>Piaractus brachypomus</i>	451			
Piraputanga	<i>Brycon hilarii</i>	355			
Pirarucu	<i>Arapaima gigas</i>	840			
Pompano	<i>Trachinotus ovatus</i>	100083			
Rainbow trout	<i>Oncorhynchus mykiss</i>	342			
Red abalone	<i>Haliotis rufescens</i>			384	
Red drum	<i>Sciaenops ocellatus</i>	464			
Red porgy	<i>Pagrus pagrus</i>	445			
Red seabream	<i>Pagrus major</i>	100174			
Red swamp crawfish	<i>Procambarus clarkii</i>		376		
Redbanded seabream	<i>Pagrus auriga</i>	843			
Redspotted grouper	<i>Epinephelus akaara</i>	831			
Russian sturgeon	<i>Acipenser gueldenstaedtii</i>	99502			
Salmon trout	<i>Salmo trutta trutta</i>	341			
Sampa (vundu)	<i>Heterobranchus longifilis</i>	360			
Sand steenbras	<i>Lithognathus mormyrus</i>	456			
Sea grape/Moai caviar	<i>Caulerpa lentillifera</i>				100191
Sea lettuce	<i>Ulva lactuca</i>				100190

Product Name	Scientific Name	AQUACULTURE			
		Finfish	Crustaceans	Molluscs	Seaweed
Senegalese sole	<i>Solea senegalensis</i>	482			
Sharpsnout seabream	<i>Diplodus puntazzo</i>	444			
Shi drum	<i>Umbrina cirrosa</i>	454			
Siberian sturgeon	<i>Acipenser baerii</i>	99501			
Silver carp	<i>Hypophthalmichthys molitrix</i>	919			
Small-mouthed wrasse	<i>Centrolabrus exoletus</i>	489			
Snubnose pompano	<i>Trachinotus blochii</i>	419			
South African abalone	<i>Haliotis midae</i>			100057	
Speckled prawn	<i>Metapenaeus monoceros</i>		374		
Spotted sorubim	<i>Pseudoplatystoma corruscans</i>	362			
Starry sturgeon	<i>Acipenser stellatus</i>	99504			
Sterlet sturgeon	<i>Acipenser ruthenus</i>	99505			
Sterlet sturgeon (albino)	<i>Acipenser ruthenus</i>	99506			
Striped snakehead	<i>Channa striata</i>	100176			
Sugar kelp/Royal kombu	<i>Saccharina latissima</i>				100175
Tambacu	<i>Colossoma macropomum</i> x <i>Piaractus mesopotamicus</i>	354			
Tambaqui	<i>Colossoma macropomum</i>	352			
Tumbacuchara	<i>Anodontites trapezialis</i>			100159	
Turbot	<i>Scophthalmus maximus</i>	368			
Wels catfish	<i>Silurus glanis</i>	361			
White grouper	<i>Epinephelus aeneus</i>	453			
White prawn	<i>Penaeus merguensis</i>		377		
Whiteleg shrimp	<i>Litopenaeus vannamei</i>		372		
Yellowtail kingfish	<i>Seriola lalandi</i>	365			
Yellow croaker	<i>Larimichthys polyactis</i>	100001			
Yesso scallop	<i>Patinopecten yessoensis</i>			382	

2 COMPOUND FEED MANUFACTURING (CFM) STANDARD

The scope of this standard covers all production steps from purchase, handling, and storage to processing and distribution of compound feed for food producing animals. This excludes the production of ingredients like forage or grains (simple feed materials), pre-mixes, additives, or medications (prepared feed supplements), etc. but covers the production of compound feeds (which can be complete or complementary), that may be produced using any or all of these ingredients as raw material.

For mammalian and avian livestock production: the manufacturing of home-mixed compound feeds (i.e., compound feed that do not leave the farm) and grazing/foraging for animals is not covered by this standard. (See 'Table 4')

For aquaculture production: all compound feed, whether sourced internally or externally must follow the criteria of the Aquaculture module. (See 'Table 4')

Feed for only those species listed under IFA for livestock and IFA for aquaculture can be certified under the CFM standard.

Table 4: GLOBALG.A.P. List of Certifiable Products – Compound Feed Manufacturing (CFM) Standard

Product Name	COMPOUND FEED	
	Livestock	Aquaculture
Compound Feed for Livestock	434	
Compound Feed for Aquaculture		433

3 CHAIN OF CUSTODY (COC) STANDARD

The scopes Crops Base, Aquaculture, and Livestock Base are covered under the scope of the CoC standard. The certification under the CoC standard version 5 is not per product but per sub-scope.

For the CoC standard v5 the following “products” relate to the different scopes and sub-scopes (See Table 5):

- i. **CoC for Crops**
 - a. CoC for Crops Base – Fruit and Vegetables
 - b. CoC for Crops Base – Combinable Crops
 - c. CoC for Crops Base – Flowers and Ornamentals
 - d. CoC for Crops Base – Hop
 - e. CoC for Crops Base – Tea
 - f. CoC for Crops Base – Plant Propagation Material

- iii. **CoC for Livestock**
 - a. CoC for Livestock Base – Cattle and Sheep
 - b. CoC for Livestock Base – Dairy (Milk)
 - c. CoC for Livestock Base – Calf/Young Beef
 - d. CoC for Livestock Base – Pigs
 - e. CoC for Livestock Base – Poultry
 - f. CoC for Livestock Base – Turkey
- iv. **CoC for Aquaculture**
- v. **CoC for Compound Feed for Livestock**
- vi. **CoC for Compound Feed for Aquaculture**

Table 5: GLOBALG.A.P. List of Certifiable Products – CoC – Sub-Scopes for the Scopes of Crops Base, Livestock Base, Aquaculture, and the CFM Standard

Product Name	CROPS BASE (Sub-Scopes)					
	Fruit and Vegetables	Combinable Crops	Flowers and Ornamentals	Hop	Tea	Plant Propagation Material
Chain of Custody for Crops – Fruit and Vegetables	100065					
Chain of Custody for Crops – Combinable Crops		100066				
Chain of Custody for Crops – Flowers and Ornamentals			100067			
Chain of Custody for Crops – Hop				100070		
Chain of Custody for Crops – Tea					100069	
Chain of Custody for Crops – Plant Propagation Material						100068

	LIVESTOCK (Sub-Scopes)					
	Cattle and Sheep	Dairy	Calf/Young Beef	Pigs	Poultry	Turkey
Chain of Custody for Livestock – Cattle and Sheep	100071					
Chain of Custody for Livestock – Dairy (Milk)		100075				
Chain of Custody for Livestock – Calf/Young Beef			100076			
Chain of Custody for Livestock – Pigs				100074		
Chain of Custody for Livestock – Poultry					100072	
Chain of Custody for Livestock – Turkey						100073
Product Name		AQUACULTURE				
		Finfish		Crustaceans		Molluscs
Chain of Custody for Aquaculture		479		479		479
Product Name		COMPOUND FEED				
		Livestock			Aquaculture	
Chain of Custody for Compound Feed for Livestock		100077				
Chain of Custody for Compound Feed for Aquaculture					10078	

4 CROPS FOR PROCESSING (CFP) STANDARD

Crops for Processing include all those crops listed in the product list under the sub-scopes Fruit and Vegetables, Combinable Crops, and Green Coffee, grown in a controlled production process, but that will be further processed (with a kill-step applied by the processor) and *not* consumed fresh, for example:

- Fruit and vegetable plants that will be canned, cooked, frozen, juiced
- Combinable crops used for human food or for feed
- Green coffee (ID 172) (only up to harvest, no processing)
