

Guidance Document for Investment by the Individual farmer for implementation of IndG.A.P.

This is only an estimate for the sake of understanding of the investment, where money to be spent by the farmer in the implementation. The estimate varies from location to location depending on the conditions and farm activities on the farm

Areas of Investment

1. Small board at the farm entrance with farmer name ,Sy no , village , extent of land and crop name
2. **Plant Protection Products stored at the farm**
 - In case, the farmer uses the product on the farm and left over is stored on the farm, then the same is kept in a room or in a rack meeting the requirements of the standard.
 - Protective cloth to be used by the operator to be available for spraying of plant protection or fertilizer applications
 - Plastic mugs with measurement indications for mixing the plant protection products or nutrient applications before use on the crop.
 - In case of plant protection spillage on the farm at the time of spraying, one small plastic bucket with sand and broom to be kept. Sign board to be placed in case of spillage
3. **Fertilizer/Micronutrients Application**
 - In case ,the farmer uses the product on the farm and left over is carried by the farmer to his home and kept at a place covering it with plastic cover and warning sign to be written
 - In case, the farmer uses the product on the farm and left over is stored on the farm, then the same is kept in a room or in a rack meeting the requirements of the standard.
4. **First Aid Kit**
 - Small box with bandage item and Dettol. See the example uploaded into Demo Farm
5. **Drinking water facility**
 - Small pot with water glass. See the example uploaded into Demo Farm

6. Hand washing facility

- Small plastic bucket with tap and soap for washing of hands after spraying of plant protection/fertilizers /other applications.

7. Toilet facility during harvesting of the crop only

- In case the farm is near to home or using another toilet facility with his neighbor, and can be reached within 7 minutes by walk or scooter. No toilet facility on the farm is required.

(Or)

- During harvesting period mobile toilet facility can be kept for use by nearby farmers, who can reach in seven minutes by walk or by scooter.

8. In case of electrical installations and open wells on the farm , warning sign boards and enclosures to be erected

9. In case of drip equipment installations on the farm, sign boards to be

Note: Considering the position of Small and marginal Farmers, the above requirements are some of the examples. You need to put the infrastructure and other requirements as per the requirements of the respective Standards.
