## **Chemical Control Program Procedure**

### **1. PURPOSE**

To establish a procedure for handling, management of non food chemicals used in the plant

### **2. SCOPE**

This applies to non-food chemicals used in the plant

### **3. RESPONSIBILITY**

Company personnel, outsourced persons

### **4 PROCEDURE**

- All chemicals used for maintenance, sanitation or pest control are stored in areas away from finished products, packing materials, processing equipment's and ingredients.
- The chemical storage area is secured with access restricted to authorised personal.
- Material Safety data Sheet (MSDS) is maintained for all chemicals used in the facility.
- All persons handling chemicals are trained in chemical control measures, and safety.
- Lubricants are stored properly and identified. Food grade lubricants are stored separately from the non food garde lubricants.
- Pest control chemicals are stored properly and identified. These are stored at a location with limited access.
- Cleaning chemicals are stored properly and identified. These are stored at a location with limited access.
- Laboratory chemicals are stored in a dedicated area.
