Operational guidelines

Approved components are being implemented through National and Regional Centers of Organic Farming. Details of operational methodologies for different components are as follows:

1. Financial support for establishment of organic input production units under Capital Investment Subsidy Scheme (CISS) through NABARD

Since 2006, National Centre of Organic Farming and its 8 Regional Centres are notified for quality testing laboratories under the FCO (1985). Authorized inspectors from State

Governments draw samples as per the requirement of FCO and send to NCOF/RCOFs for analysis. Reports of such samples are being provided to sample concerned State authorities for further necessary action.

NCOF and RCOFs carry out research on new organic and biological products to define their standards and testing protocols for inclusion into FCO (1985). To meet the regular requirement of mother culture strains of effective microorganisms for production of biofertilizers, more than 200 strains are being maintained at these centres. All these strains have been developed by NCOF/RCOF and are recommended for commercial production. Such strains are provided to the producers on demand at nominal cost of Rs. 20/- per slant.

Support to Organic Input production units

To boost the production of organic inputs, under Capital Investment Subsidy Scheme (CISS) of NPOF financial assistance is being provided to various Central/ State Govt, Non Govt and private entrepreneurs @ 33% of total financial out lay (TFO) limited to Rs.63 lakh for setting up of fruit/vegetable market/agro waste compost production unit (100 TPD) capacity and 25% of TFO limited to Rs. 40 lakh for setting up of State of art liquid/carrier based bio-fertilizer/biopesticide production units (200 TPA Capacity). To Govt agencies funds are being sanctioned directly by DAC&FW and to private agencies the assistance is available as credit linked back ended subsidy through NABARD. The scheme is continuing since the year 2004-05. Under the scheme any agency, company or individual entrepreneur can directly submit the project proposal to any scheduled bank, obtain loan and set up production unit. It is the responsibility of the bank to avail subsidy and/or refinancing from NABARD.

2. Quality control of biofertilizers and Organic fertilizers –

With the inclusion of biofertilizers and organic fertilizers under Fertilizer Control Order (FCO), a regulatory mechanism has been introduced in the country w.e.f. March 2006. NCOF and its RCOFs have been declared as Notified Quality Control Analysis laboratories. Under the system samples are being drawn by the statutory authorities of State Agriculture Departments and submitted to NCOF or concerned RCOF for quality analysis.

Besides these, NCOF and RCOFs also undertake quality analysis of other inoculants and organic manures not covered in FCO for study purposes.

2.1. The details of biofertilizers and organic fertilizers samples analyzed in fulfillment of requirement under FCO during the year 2020-21 were as follows:

2.1.1 Biofertilisers - During year 2020-21 a total of **265** sample of different biofertilisers under FCO were analyzed, out of which 60.00% samples were found sub-standard. The Centre wise detail of Quality testing is given in Table- 6.

2.1.2 Organic Manures: During the current year, 2020-21 total of **262** samples of organic manures (including non FCO) were tested out of this 67.00% samples were found sub standards. The Centre wise detail of Quality testing is given in Table- 7.

Annexure I

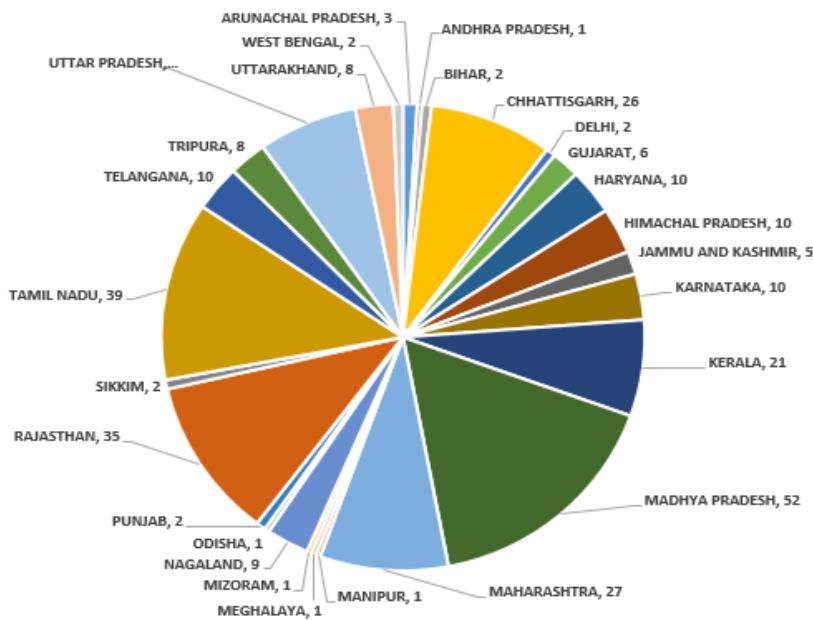

Status of Participatory Guarantee System – INDIA (PGS-INDIA) Organic certification system in India (2020-21)

Participatory Guarantee System (PGS)-INDIA organic certification system was launched in 2011 by Department of Agriculture and Cooperation & Farmers welfare, Ministry of Agriculture & Farmers welfare, Government of India and is an alternative to third party certification. The programme is implemented through National Centre of Organic Farming (NCOF), Ghaziabad and its nine Regional Centres (Ghaziabad (HQ), Bangalore, Nagpur, Jabalpur, Panchkula, Bhubaneswar, Imphal, Bihar & Gujrat). NCOF is secretariat of the PGS-INDIA System, and Director, NCOF as the Executive Secretary will play crucial role in implementation of all activities of PGS- INDIA programme as per the PGS guidelines. Participatory Guarantee System (PGS) is an organic quality assurance system that is locally relevant, emphasize the participation of farmers/producers, stakeholders, and consumers and operate outside the frame of third party certification. The process is very simple where group of farmers verify each other, document it and take collective decision on the organic status of individual producers in compliance of PGS standards. Collective guarantee of organic status decision is then submitted to Regional Council, which in turn on verification approves (or reject) the certification decision. Process/ production standards are the same as of NPOP. The PGS certification system is based on principles of participation, shared vision, trust, transparency, horizontality and networking. PGS is a locally applicable quality assurance system. There are two types of Logos used under PGS-INDIA certification programme, at the beginning of organic cultivation and upto two year, farmers will be considered under conversion, and they certified with **PGS-INDIA GREEN** logo. After two years (three years for plantation crops) period of conversion upon satisfaction the farmers certified with **PGS-INDIA ORGANIC** logo, and the same will be used on packing material while marketing organic produce.

Regional Councils: The organization which are authorized under PGS-INDIA certification system to play role in registration of farmers, training, online documentation, inspection, residual analysis, soil sample analysis certification and marketing as per PGS-INDIA guidelines. At the beginning in the year 2011 implementation of PGS-INDIA certification system was started through twenty (20) authorized Non -Governmental organizations (NGOs) as Regional councils, and there was no financial support from the Government of India to operate PGS certification system. After three year's evaluation, it has been found that the certification system is acceptable among the farmers and consumers and farmer friendly system. To promote organic farming and PGS-INDIA certification in larger scale Government of India supported financially through launch of Paramparagath Krishi Vikas Yojana (PKVY) in the year 2015. At present, 315 regional councils are authorized to work under PGS- INDIA system. Out of 315 are 19 Companies, 43-NGO/Cooperative/Trust, 253 – State Government from different States {ARUNACHAL PRADESH (30), ANDHRA PRADESH (1), BIHAR (2), CHHATTISGARH (26), DELHI (2), GUJARAT (6), HARYANA (10), HIMACHAL PRADESH (10), JAMMU AND KASHMIR (5), KARNATAKA (10), KERALA (21), MADHYA PRADESH, (52), MAHARASHTRA (27), MANIPUR (1), MEGHALAYA (1), MIZORAM (1), NAGALAND (9), ODIsha(1), PUNJAB(2), RAJASTHAN(35), SIKKIM(2), TAMIL NADU(39), TELANGANA(10), TRIPURA (8), UTTAR PRADESH(21), UTTARAKHAND(8), WEST BENGAL(2) (Fig.1)}.

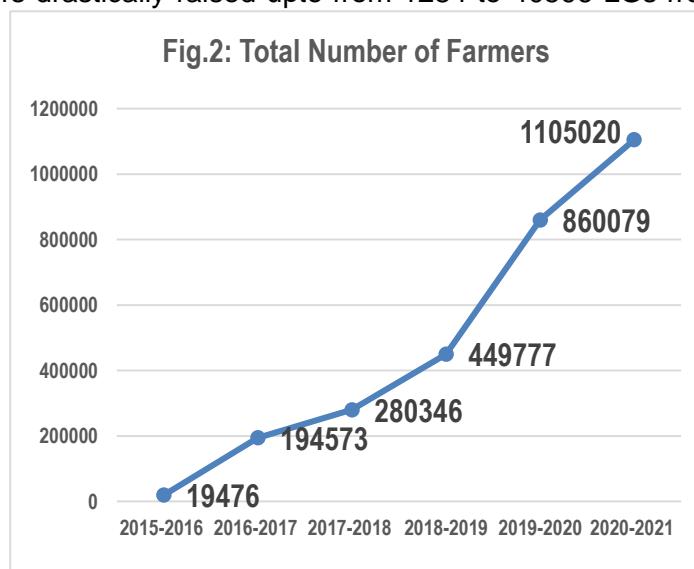

Fig.1 The number of RCs with State wise under PGS system in the year 2020-2021

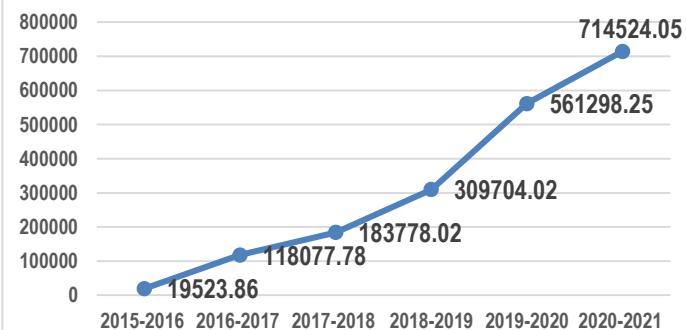

It has been recorded continuous increase in the number of regional council from 20 to 315 from the year 2011 to 2020-21. The increase in participation of regional council under PGS system shows growing demand and acceptance of system among the different stakeholders of organic farming community.

Number of Farmers groups and farmers: Even though PGS was found farmer friendly due to no direct financial support from the Government it was not able to attract large scale participation of farmers under PGS INDIA certification till 2015 by authorized RCs. In the year 2015 through launch of PKVY scheme and supporting PGS certification through funds support the number of farmers groups/clusters drastically raised upto from 1284 to 40596 LGs from the year 2015-16 to 2020-21. The number of individual farmer under LGs increased from 19476 to 1105020 from the year 2015-16 to 2020-21 (Fig.2).The numbers of farmer's group and farmer's registration was continuously increased from 2015-16 to 2020-21. It shows the popularity and easy mode of acceptance of certification system among the farmers and also the positive results obtained on productions system through organic farming and practices, and also rise in the demand of PGS certified products among the consumers is attracting more farmers to adopt organic farming for cultivation of crops.

Area under PGS-INDIA certification: The area under PGS-INDIA certification was 19523.86 ha in 2015-16 and the area increased slowly and at present **714524.05 ha** land is covered under PGS certification system in the year 2020-21 (Fig. 3). It was rapid increase in participation of farmers under PGS-INDIA certification system may be observed which will pay way to local organic market in a big way.

Fig.3: Total Area (ha)

Online PGS-INDIA webportal (<http://pgsindia-ncof.gov.in>) : Even though there are large numbers of farmers involved in organic farming under PGS-INDIA certification, their information properly not documented and information about farmers and agencies working are visible all public domain which is a limiting factor for the expansion of organic marketing. In order establish information access to all domain of people Government of India launched PGS-INDIA online webportal (<http://pgsindia-ncof.gov.in>) on 15th July , 2015. All the details of farmer's / regional councils are available in this website, and all information is accessible to public domain. The consumer product verification was also enabled in this webportal. Any public can track their products from where it has obtained and also details of producer/ farmers who has grown the products on PGS-INDIA webportal.

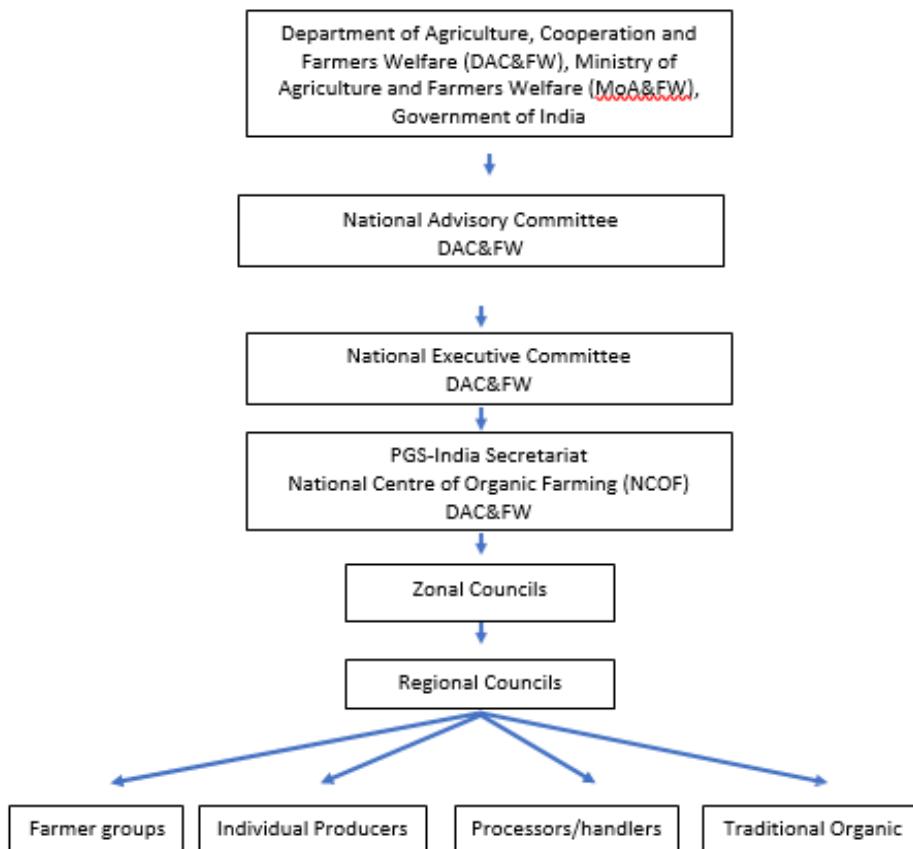

Revised PGS India Guideline in the year 2020-21: The PGS India Guidelines has been revised and the major changes is mentioned below:

1. The PGS operation structure changed
2. Introduction of conflict of Interest
3. Introduction of Service Provider / Facilitating Agency

Biofertilisers and Organic Inputs under FCO (1985)

Status of Biofertilisers and Organic Fertilisers under FCO, 1985

In order to ensure availability of quality of fertilizers to the farmers, Government of India has declared fertilizer as an essential commodity under Essential Commodities Act, 1955 and enacted Fertilizer Control Order (FCO), 1985 to regulate the trade, price, quality and distribution of fertilizers in the country. The State Governments are the enforcement agencies and are adequately empowered to take appropriate administrative and legal action against those who indulge in production and sale of fertilizers which do not meet the specifications prescribed in the FCO, 1985.

Biofertilizers and Organic Fertiliser have been included in the FCO, 1985. Bio-fertilizers are included under Schedule—III Part-A of the FCO, 1985. Presently, *Rhizobium*, *Azotobacter*, *Azospirillum*, Phosphate Solubilizing Micro-organism (PSM), Potash Solubilizing Micro-organism, Zinc Solubilizing Micro-organism, and Mycorrhizal Bio-fertilizer, *Acetobacter*, consortia of microorganism are included. Organic fertilizers are specified in Schedule-IV Part-A of FCO, 1985. Presently, city waste compost, vermi-compost, organic manure, de-oiled castor cake, Phosphate rich Organic manure (PROM) manure and liquid Organic manure are notified.
