Proposal for

GAP

Good Agricultural Practices

About Arete Consultant Pvt. Ltd.

Arete Software specializes in developing custom web-based applications that are system independent, easy to deploy & upgrade, gives universal access to remote users and commensurate with the ever-growing use of Internet. We integrate and automate business processes with custom web-based solutions by providing fully functional and highly interactive web-based applications to meet the unique organizational needs.

Our MIS web applications are widely being used by ministries in Central and State Governments including that for monitoring state government budgets, implementing, mapping and monitoring their programs & schemes.

Arete's Mobile based applications are used by the government for doing surveys and mapping profile of target audience, helping in policy making and collecting data at national and state level. Arete has developed a variety of Apps for its private clients. There are apps to enable the clients capture online data of their pan India operations (more than 1000 centers), carry out online loan facilitations, monitor manufacturing companies, monitor batch wise production, and app for online astrology to name a few.

Our portals are also widely being used by industry associations and professional bodies to keep their members updated. Arete has industry specialized research divisions for gathering and disseminating relevant information to its members.
